

## Message from the President

May 2006

I am very pleased to present the SUNY College at Brockport Alumni Placement Report that is based on results from the Class of 2005 Alumni Placement Survey conducted by the Office of Career Services.

This important report represents extensive research in collecting and analyzing information on the Class of 2005 for both undergraduate and graduate programs. Student success is the #1 priority of the College. This report provides valuable information to help us determine whether or not we are successful in preparing our graduates for their professional future and to tailor our services for student success. Based on the data we received from our 2005 alumni, SUNY Brockport can be proud of the quality opportunities and services that have been, and continue to be, provided to ensure the success of our recent and future degree recipients.

This year, we achieved 75% and 74% response rates respectively for the baccalaureate and master's degree surveys. Of all 2005 bachelor's degree respondents, there was a 92% placement rate. A "placement" is a graduate who is employed, enrolled in graduate school, or doing both. Placement rates for previous years are consistently between 90 and 93%. Almost 88% of employed Brockport graduates work in New York. The remainder are successful in finding jobs throughout the country and world.

I hope that you find this annual resource on SUNY Brockport's employment and graduate school statistics informative and useful. Any questions or comments regarding the survey and report should be directed to the Office of Career Services at (585) 395-2159.

Sincerely,

John R. Halstead, PhD  
President
