

Environmental Science Minors

Rationale

1. The Environmental Studies offers students a variety of scientific, social, economic and political perspectives on environmental issues. Gaining these perspectives will help students become environmentally literate citizens and employees.
2. The Environmental Science minor provides sufficient breadth and depth in environmental science as preparation for postgraduate education or employment, courses selected for the minor will be above and beyond those required for the student's science major.

Environmental Science Minor

Catalog Description: The minor in Environmental Science is designed to allow those majoring in related disciplines to gain a breadth of experiences. To ensure maximum breadth and depth of training, the schedule of elective courses for the minor in Environmental Science must be in disciplines other than the student's own major and formally developed through the Department Chairperson.

Required:	ENV 202 Environmental Science	4 cr
	CRJ 440 Environmental Law	3 cr
	ENV 303 Ecology*	4 cr
	300 and 400-level electives by advisement	7 cr

*Biological Sciences majors are required to take Analytical Chemistry in place of ENV 303, Ecology
