

## Three-Tier Medication Guide

This printable document provides a listing of covered medications and their appropriate tier on the BlueCross BlueShield of Western New York Three-Tier Pharmacy Benefit.

BlueCross BlueShield's Three-Tier Pharmacy Benefit was developed to help members and their physicians select equally effective, lower cost options for the most common drug categories. This list divides medications into three tiers or categories:

*First Tier (Formulary Generics Only)*

*Second Tier (Formulary Brand Products)*

*Third Tier (Non-Formulary Brand and Generic Products)*

Using generic drugs or second tier brand name drugs, when available, can save you money. Talk with your doctor or pharmacist to find out if these options are right for you.

If you have any questions about the Three-Tier Guide, please call Customer Service or use Click & Comment to submit your question to us through our Web site. Our Formulary and Three-Tier Guide can also be viewed on our Web site at [www.bcbswny.com](http://www.bcbswny.com).

Disclaimer: This list is effective only for the dates shown on the Guide. The Three-Tier Guide is subject to change, as we regularly review medications and existing therapies for inclusion in the BlueCross BlueShield of Western New York Formulary. The tier that a medication is currently in may change during the effective dates of the guides due to generic availability.
