

OVERVIEW: How to compute your undergraduate GPA

OFFICE/DEPARTMENT RESPONSIBLE: Office of Registration and Records

DATE UPDATED: 5/4/2012

Any course taken at The College at Brockport on the “letter grade” option contributes to your semester/cumulative GPA. The only exception to this is the course that is repeated, in which case, the last grade earned in the course is the one that contributes to your GPA. (All courses taken remain on your transcript, however, whether repeated or not.) Computing your own GPA is an easy matter, as shown by this example:

Course	Credits	Grade	Quality Points
THE 205	3.00	B	9.00
SOC 100	3.00	E	0.00
ENL 171	3.00	C	6.00
BIO 111	3.00	D	3.00
CHM 205	4.00	A	16.00
Totals	16.00		34.00

With these grades for a semester, you would earn a semester GPA of 2.12, which is the result of dividing the total number of quality points (QP) earned (34) by the number of credits completed (16). $QP/\# \text{ credits} = \text{GPA}$ or $34/16 = 2.12$. To figure your cumulative GPA, follow the same process for all courses taken at The College at Brockport. If you want to be absolutely sure, check your DARS report or your transcript at the end of each semester. You may also go to www.brockport.edu/firstyear/gpa.html to use the GPA calculator.
