Playlists are themed collections of materials and can be created by any user of the database. Users can create playlists containing various types of documents, images, whole videos, tracks, segments (clips) and/or other items such as links to any URL. Playlists can be annotated, edited, copied, shared, and all playlists contain their own unique static URL. Playlists can be used as lists of personal favorites, class viewing/listening assignments, or as a teaching resource for in-class use.

The My Playlists tab contains a user's personal playlists, and are only visible to individual users.
