A PROPOSAL FOR AN INTERDISCIPLINARY MAJOR
IN INTERNATIONAL BUSINESS AND ECONOMICS

SUBMITTED TO
THE UNDERGRADUATE CURRICULUM COMMITTEE
OF THE FACULTY SENATE
OF THE STATE UNIVERSITY COLLEGE AT
BROCKPORT, N. Y.

FEBRUARY 22, 1985
(revised, 21 March 1985)

The Ad Hoc Committee to Develop
an Interdisciplinary Major in
International Business and Economics

W. Borowiec
J. Mason
V. Rojas

J. Perry, Chair
State University of New York  
State University Plaza  
Albany, New York 12246  

Office of the Vice Chancellor for  
Academic Programs, Policy and Planning

November 13, 1984

President John E. Van de Watering  
State University College  
Brockport, New York 14420

Dear President Van de Watering:

I have reviewed your letter of intent to offer the Bachelor of Arts degree in International Business and Economics. You may proceed to develop a program proposal.

Although the University at Buffalo offers a concentration in International Business and World Trade, there are currently no registered or proposed programs similar to Brockport’s proposal in SUNY. International Business is in the HEGIS 0513 classification.

As you are aware, objections have been raised on grounds that the program would have a negative impact on SUNY Buffalo’s concentration in international business and world trade, and there is a question as to its appropriateness as a major degree program at the undergraduate level. The Central Administration’s Review Committee was equally concerned about these issues and expressed the strong desire that these issues be addressed in the program proposal.

It would be very much appreciated if you would let Dr. Penney know as soon as possible whether you plan to submit a program proposal. Should you decide to develop a program proposal, the procedures outlined in Memorandum to Presidents, Vol. 83, No. 7, dated June 24, 1983 should be followed.

Sincerely,

Kenneth O. Hall  
Assistant Vice Chancellor  
for Academic Programs

cc: Dr. Altes  
Dr. Penney
MEMORANDUM

TO: Walter Borowiec, Joseph Mason, John Perry, Victor Rojas, Stephen Ullman

FROM: Robert D. Marcus
Vice President for Academic Affairs

DATE: January 18, 1985

Thank you for agreeing to serve on the Ad Hoc Committee to develop an Interdisciplinary Bachelor of Arts Program in International Business and Economics. As you know, SUNY Central has accepted our letter of intent enabling us to proceed to the development of the program. We are anxious to submit the program this winter. Dr. Perry, who is chairing the committee, will set a timetable. I know this constitutes an additional demand on your busy schedule, but please know that I recognize the importance of this undertaking and am grateful for your efforts in support of the College.

STATE UNIVERSITY OF NEW YORK
ACADEMIC PROGRAM PROPOSAL

Campus: College at Brockport

Date: 1 April 1985

Proposed Program Title: International Business and Economics

Proposed Degree/Certificate: Bachelor of Arts

MEIS Classification and Number: 0613

Academic units that will offer program:
School of Letters and Sciences, School of Professions

Projected Beginning Date: Fall Semester, 1985

Projected number of students (headcount):

YEAR

I  II  III  IV  V

Full-time  6  12  25  48  53

A.1 Summary of required majors in international business and economics

Prior to admission to the major in International Business and Economics, a student will complete the lower half of the Economic Policy and Business Theory Core of the major: "Macroeconomics," "Fundamentals of Accounting I & II," and "Introduction to Economic Statistics." The Quantitative Area Requirement ("Applied Calculus for the Social and Life Sciences I") will be completed with a grade of "C" or better in each course. The upper half of these cores (consisting of "Introduction to Economic Statistics," "Principles of Marketing," "Principles of Management," and one course in either "Price Theory," "Income Theory," or "Managerial Economics") will be completed after admission to the major as will the International Business Core. The International Business Core consists of four three-credit courses: "International Trade Theory," "International Economic Policy," "Economics of Development," and "Economic Planning."

Concurrent with the completion of these requirements, the student will complete a fifteen-credit-hour core of cross-cultural courses and one three-credit foreign language course at the 300-level or above. The Cross Cultural Perspective Core consists of BUS 366, "Human Relations in Management," and twelve credit hours chosen from a list of appropriate social science or humanities courses (a complete list of these courses is contained in item M below).
Section B

B. PLANNING OBJECTIVES

1. Describe the purpose, goals, and objectives of the proposed program. Identify existing or proposed courses of the campus to the extent or related disciplines and the expected impact of the program on them.

a. Purposes, Goals and Objectives:
   The interdisciplinary International Business and Economics major is an undergraduate course of study leading to the Bachelor of Arts degree that is designed to equip students with a working knowledge of the principles of business and economics and, at the same time, provide them with an understanding of the geo-political and cultural aspects of international business. The major seeks to conjoin a program of professional studies with meaningful and congruent liberal arts and social science courses in order to train students for entry-level management positions in international business and for graduate-level studies in international management. This program is designed to provide an option to our students similar to one which is presently available only to students who choose to "double major" in Business Administration (with a concentration in International Business) and either a foreign language or one of several social sciences majors that Brockport offers.

b. Existing Programs of the Campus in Related Disciplines:
   1. Brockport has a specialization in International Business Management available as a option to its Business Administration and Economics majors. The specialization consists of the following coursework:
      (Four courses are selected from among the following):
      
      * BUS 345, Environmental Aspects of International Business
      * BUS 445, International Business Management
      * ECN 441, International Trade Theory
      * ECN 442, International Economic Theory
      * ECN 451, Economics of Development
      * ECN 452, Economic Planning: Theories, Policies, Problems

      This specialization forms twelve of the thirty nine upper-division credit hours required for the major in Business Administration (another eighteen credit hours of lower-division...
prerequisites are also required of the student intending to major in Business Administration.

2. Brockport also has an undergraduate major in Global Studies which requires students to complete the following course of studies consisting of thirty-nine credit hours distributed as follows:
   a. Fifteen hours of required global exploration courses:
      
      GBS 102 (HST 102): The Modern World  
      GBS 111 (PLS 111): World Politics  
      GBS 100 (ANT 100): Anthropology and the Changing World  
      GBS 230 (PLS 120): Geopolitics  
      GBS 212: The Nature of Global Interdependence
   b. Three hours of quantitative skills training selected from the following:
      
      GBS 201 (SOC 200): Social Statistics  
      GBS 202 (PSY 202): Introductory Statistics for Psychology  
      GBS 300 (PLS 300): Political Statistics
   c. Three hours of additional special training in International Economics:
      
      GBS 372 (PLS 372): The Politics of International Economics
   d. Foreign language prerequisite: demonstration of competency at the first or survival level of foreign language training. Competency is measured by the student's passing a competency examination administered by the Foreign Language Department. The student may prepare for the exam (a) by taking six credit hours of foreign language study at Brockport; (b) by taking a similar number of credit hours at another institution, (c) by taking a similar basic language program elsewhere.

   The student is strongly encouraged to continue his/her foreign language training another six credit hours to the second or functional level of foreign language competency.

   e. Nine credit hours to be taken in one of the four global issue tracks listed below. Under each issue area, there is an asterisked course. This course is required of students choosing that track. The remaining six credits may be selected from the other courses in the track at the option of the student.
Section B

Global Issues Areas:

International:
- GBS 301 International Simulation
- GBS 336 (PLS 336) Issues in International Relations
- GBS 364 (PLS 364) Third World Politics
- GBS 445 (PLS 445) International Law and Organization

Cross-Cultural Communication:
- GBS 318 (CMC 318) Cross-Cultural Communication
- GBS 326 (ANT 326) Cultural Encounters
- GBS 340 (PHE 340) Socio-cultural Perspectives of Sports (2 credits)
- GBS 263 (BIO 263) Perspectives on Environmental Issues
- GBS 302 (GEL 302) Earth and Man
- GBS 205 (BIO 205) Ecology
- GBS 415 (EBC 415) Environmental Climatology

Socio-Economic Problems:
- GBS 372 (CHE 372) Energy and Environment
- GBS 451 (ECN 451) Economics of Development

For all issue areas: GBS 499 Independent Study in Global Studies

f. Six credit hours of immersion in a regional cultural complex such as China, Latin America, Islamic world, Africa, Western Europe, Canada, or the Communist bloc. Because of their number, most regional courses are not cross-listed with Global Studies. Rather, the student is required to consult closely with the Global Studies director and to obtain his approval in the selection of the appropriate courses in order to ensure that the courses are truly regional in character and meet the interdependence criterion. (The six credit hours of immersion in a regional cultural complex should be taken in an area where the student's foreign language is commonly used.)

1. Other courses of interest and recommended to Global Studies majors are:
- BIO 203, Perspectives on Environmental Issues
- ECN 202, Principles of Macroeconomics
- CMC 318, Advanced Composition
2. The student is strongly encouraged but not required to undertake a semester of study abroad in the area of his/her language competency and regional specialization. The semester abroad may be in the form of an academic program of study or an internship.

3. The relationship of this proposed major to existing programs is illustrated by the attached chart which shows the requirements of the proposed major in International Business and Economics, with the present Global Studies and Business Administration majors in columnar form (attachment 1).

c. Impact of the proposed program on Brockport's existing courses:

The proposed program in International Business and Economics will have various courses from the two above listed programs among its required coursework. This will result in slightly higher enrollments in a few of these courses. Beyond that, the impact to campus programs will be minimal or non-existent.

B. 2. Identify similar programs at other institutions, public and private, primarily in the service area and region and, where appropriate, the potential impact on them:

There are seven bachelor's-level degree programs in International Business (HEGIS code: 0513) registered by the New York State Education Department. (See attached letter, attachment 2). They are:

- Hofstra University (Hempstead, NY), B.B.A.
- Marymount College (Tarrytown, NY), B.A., B.S.
- New York University (New York City), B.S.
- Pace University (Pleasantville, NY), B.B.A.
- Pace University (White Plains, NY), B.B.A.
- Pace University (New York City), B.B.A.

The Index of Majors (1984-85, seventh edition, The College Board, ETS: Princeton, N.J., p. 343) lists twelve four-year colleges in New York State which offer bachelor's degrees in "International Business." In addition to the seven programs cited in the paragraph above, programs at the following six institutions appear on this list:
Section B

Berea College, SUNY (New York City)
College of Mount St. Vincent (Riverdale, N.Y.)
Elmira College (Elmira, N.Y.)
Friends World College (Huntington, N.Y.)
Nazareth College (Rochester, N.Y.)
State University of New York, College at Plattsburgh
(Plattsburgh, N.Y.)

Finally, the State University of New York at Buffalo has a certificate cluster in International Business and World Trade available as an option to its students who are majoring in Geography.

It would appear from the fact that these seven programs are not registered with a Hegis code of 0513, that they are specializations and/or concentrations within the existing general Business Administration major program (or, in the case of SUNY Buffalo's program, within the Geography program) which these institutions offer. An examination of the most recent undergraduate catalogs of these institutions confirms this to be the case in all of the above instances except for the International Business program at Elmira College.

Copies of the catalog descriptions of SUNY/Buffalo's Department of Geography's "International Business and World Trade Cluster," Nazareth College's program(s) in International Business and Elmira College's International Business major--the three programs in Brockport's region--are attached (attachment 3). The program at SUNY/Buffalo is a concentration available only to majors in Geography at SUNY Buffalo (see attachment 3, page 3) the "programs" in International Business at Nazareth College of Rochester consist of either the election of a concentration in a modern foreign language by the student who is pursuing a Bachelor of Science degree in Management Science, or the election of a concentration in Business/Management by the student pursuing a Bachelor of Arts degree in a modern foreign language (attachment 3, pages 2-5); Elmira College's major in International Business does not appear to be an optional concentration (or cluster) within another major (attachment 3, pp. 6-7). The College at Brockport is unable to determine why this program is not registered by the New York State Education Department as a Hegis Code 0513 program.

It is unlikely that the International Business and
Economics program which is proposed by the State University College at Brockport will have any real impact on enrollments in any of these thirteen existing programs for several reasons:

1. All but three of these thirteen programs are outside Brockport's region (they are all, except for the program at the State University College at Plattsburgh, which, although it appears on the College Board list, is not registered with the State Education Department under Regis Code 6909); does this Plattsburgh program appear as a major on the Curriculum Chart of the SUNY 1984 Application Guidebook in the New York City-Long Island-Westchester area?

2. Of the three undergraduate International Business programs at Colleges in Brockport's region—Elmira College, Nazareth College, and SUNY/Buffalo—two (Nazareth's and Elmira's) are at small private colleges whose clientele are not the normal clientele for Brockport (or for SUNY) programs. It should also be noted that none of the three programs in Brockport's region is registered with the New York State Education Department as a Regis Code 6913 program.

3. The undergraduate certificate program in the Geography of International Business and World Trade which the Department of Geography at SUNY/Buffalo offers is one of four "undergraduate clusters" which a student majoring in Geography at Buffalo may elect. As such, it has the same status as Brockport's present International Business concentration (that is, one of the six clusters which a Business major at Brockport may choose). These two programs in the status of a minor restricted to students of a specific major. SUNY/Buffalo's program in World Trade concentrates most specifically on these aspects of "social and economic geography" which relate to international trade, while Brockport's existing cluster in International Business concentrates primarily on international business topics. The proposed major differs from both of these existing programs in that it 1) is to be a free-standing major and 2) it will concentrate directly on developing the student's linguistic and cultural awareness of global issues in addition to the development of the student's mastery of the technical business skills required for entry-level positions in firms involved in international business. The greatest similarity between these three programs is that each requires the same (or almost the same) sequence...
of specific business courses.

In a letter of 16 July 1984 [Attachment 4], Dr. James McConnell, the Chairman of SUNY Buffalo's Geography Department observes that this proposed program and Buffalo's undergraduate cluster in World Trade would be "preparing people for the same job market." Further, he observes that since both programs are "drawing undergraduate... students from the Brockport-Rochester region, it seems very probable that these would indeed be an overlap in service areas should Brockport develop such a program."

If indeed there might be an overlap, such an overlap would already exist between the present International Business "concentration" in Brockport's Business Administration program and the "cluster" within SUNY/Buffalo's Geography major. A free-standing interdisciplinary major in International Business and Economics would:

- be more likely to attract enrollments from a different population of undergraduates either in the Rochester or Buffalo areas than do either of the two existing (more specialized) programs.
- be performed too small in size to have any real impact on either cluster's enrollments.

If in fact, graduates of these programs were being prepared for a similar job market, the evidence suggests that such a job market is sufficiently large (and growing) to absorb the fifteen graduates of Buffalo's cluster program, the seventeen graduates of Brockport's International Business concentration and the projected 8-10 graduates of this proposed interdisciplinary major.

Since this proposed program in its present form will not have required internships, it will have no impact on SUNY/Buffalo's graduate-level internships in the Rochester area (which is the other objection raised in Dr. McConnell's letter). Indeed, students who complete this major at Brockport will be very likely to form a pool of candidates for Buffalo's graduate program.

3. Describe briefly proposed arrangements for required external clinical instruction, seminar placement, practice teaching, internship, etc., if any and how
these arrangements would impact on other institutions using the same facilities, if any:

At this stage in our planning there are no intentions for requiring external clinical instruction, agency placement, practice teaching, internships, etc., consequently, there is likely to be no impact on other institutions using the same facilities. However, we do not wish to close our option to develop an internship in an area business whose primary focus is on international trade. However, if this option is ultimately selected, it is unlikely that there would be any impact on other institutions using the same facilities since there are no other institutions who are using these facilities, and even if there were, the Rochester-area has such an abundance of facilities of this type that there would be very little likelihood of any impact. (See Item C.1.A., paragraph 2 below and attachment 5 and 9).
Section C

D. NEED:

1. Identify the potential need for this program for the clientele it will serve in terms of the economic and/or educational needs of the area in which it is to be located. New York State at least, and if necessary, the nation:

a. In the past thirty years, American business has moved increasingly from domestic to overseas markets. In 1957, only 8.6 percent of all of American industry's earnings were attributable to non-U.S. sources; by 1974 that had become 29 percent (Source: Bergsten, C. Fred, et al., American Multinationals and American Interests, Washington: The Brookings Institution, 1978). In 1980 more than 200 of the Fortune 500 list of American corporations reported at least 20 percent of their earnings were a result of foreign sales (sixty of these firms reported that more than 40 percent of their sales in 1980 were made abroad (Source: Key Company Directory, New York: The Conference Board, 1980)). Between 1972 and 1981, the number of American workers involved in the production and export of manufactured goods doubled (Source: International Financial Statistics Yearbook, Washington: The International Monetary Fund, 1982). Most analysts of trends in American business agree that this internationalization of American business is not likely to decrease. Indeed, its acceleration has been characterized as an imperative need.

If the economy of the United States is to expand and grow in the remaining years of the twentieth century, it must, according to two recent Presidential reports, continue to expand its share of the international marketplace (Twenty-Sixth Annual Report of the President of the U.S. on the Trade Agreements Program, 1981-82; and The Exact Imperative: A Report to the President submitted by the President's Export Council). While many of the nation's largest corporations have become actively involved in that international marketplace, smaller firms are just beginning to explore it. Fewer than 15,000 companies (of more than 4.4 million in the U.S.) presently export their goods and/or services. This is one of the factors which has resulted in a trade deficit of more than $60 billion in 1983 and a 1984 trade deficit of more than $123 billion.

The value of export business to the State of New
York in 1982 (the last year for which data are available) has been estimated (by the U.S. Department of Commerce) as being in excess of $13 billion; one job in six in New York State depends directly on the State’s overseas trade. The Greater Rochester Metropolitan Area has accounted for approximately 40% of New York State’s export business (or $5.6 billion) since 1982; one job in four in this five-county region of western New York depends directly on overseas trade. More than three hundred businesses based in the Rochester area are involved in the export of goods and services including the Eastman Kodak Co., the Xerox Corporation, Bausch and Lomb, Inc., and the Castle and Nolte divisions of Sybron Corporation. Since 1982, the Greater Rochester Metropolitan area has led the nation in the per capita export of high technology products and was in 1984, the seventh largest exporter in the United States (of all types of goods and services). An application is presently on file with the U.S. Commerce Department for the creation of a foreign trade zone in Monroe County.

The degree program which we propose to initiate will train students for entry-level in business which are involved in the export or import of goods and/or services. We believe that there is a clear and overwhelming need for such qualified graduates in this region, the State of New York, and the nation.

Among the conclusions of his study of the acquisition of international skills in American business, Stephen Kobrin (of the Graduate School of Business, New York University) notes, "International expertise contributes to managerial effectiveness in most circumstances. The real question, then, is how important is the contribution made by international expertise and how important is the edge that it provides? At the level of both the individual company and the U.S. economy, I think that it is important and is likely to become more so in the future."

(Source: Stephen Kobrin, International Expertise in American Business, New York: Institute of International Education, 1984, p. 52). Professor Kobrin concludes his study with the note that, in addition to the acquisition of technical and/or functional skills, “it is critically important that students who plan managerial careers in large international firms develop at the college level the basis for acquiring international
Section C

expertise. First, that means at least some language competency. Second, it means developing a systematic understanding of the differences in political and economic systems, culture, behavior, world view, and interpersonal interaction that one finds once one leaves home. That requires traditional academic courses, perhaps including comparative politics, economics, and anthropology, taught in such a way as to leave the student with a framework upon which to build through further study and experience. It also requires nontraditional courses that involve simulations and negotiating exercise. What is important is that the student develop a systematic understanding of international differences and an ability to analyze and synthesize on his or her own. (p. 55). The program we propose in International Business and Economics seeks to provide the means for the acquisition of these abilities.

Justification for this Program as an Undergraduate Course of Study:
There are 166 baccalaureate-level programs in International Business offered by America's colleges and universities; twelve of these programs are offered by universities and colleges in New York State (Source: The Index of Majors 1984-85. The College Board, ETS, Princeton, N.J., pp. 342-44). An inescapable conclusion to be drawn from that data is that such a program of study is indeed appropriate for the undergraduate-level of instruction. However, even if such a number of baccalaureate-level International Business programs were not presently being offered at American colleges, there would still be sufficient evidence to support the contention that such a program of study is appropriate to an undergraduate degree.

The proposed International Business and Economics program includes an interdisciplinary body of knowledge appropriate for entry-level positions in the corporate sector as well as in private and public organizations which deal directly or indirectly in international-intercultural matters. Such body of knowledge provides students with appropriate skills not only in the areas of business administration and economics, but also in the areas of quantitative skills, intercultural
understanding and a foreign language.

2. A comparison of the coursework required in the proposed program with the coursework required in the current business administration major (international business track), reveals that the content of the coursework relative to business and economics is very similar in both programs. The content of the proposed program is enhanced with the coursework in the cross-cultural core, the quantitative skills component and the foreign language study.

3. Each component of this proposed program exists presently as a component of an existing undergraduate degree program. Therefore, it is inconsistent to believe that in combination, the aggregate would be inappropriate as an undergraduate course of study.

c. Is the need being met by other institutions?
The State University College at Brockport is persuaded that the need for graduates with training in the areas of International Business is such that the need is not being met by programs presently in existence. Data supplied by the New York State Education Department support this contention (see attachment 5). Between 1977 and 1983, only 237 students were graduated from programs in New York State with Regents code 0513. These data also suggest that the student demand for such programs is growing; each year between 1977 and 1983 the number of students graduating from such programs has increased steadily (from sixteen in 1977 to seventy-four in 1983).

c. State the extent to which such need will be met if the program is established:
The potential need for graduates with training in International Business and Economics in the Greater Rochester area is envisioned by the State University College at Brockport to be such that a program of the size as the one proposed will not fully meet that need (see also, below, section C.3.b., and attachment 9).

c. Describe fully and completely how the need was established:
The need for a program in International Business and Economics at Brockport was measured by the following factors:
1. The volume of import/export trade done by businesses in the Rochester/Monroe County
Section C

area (see above, section C.1.a., paragraph 2 and below, attachment 9).

2. The fact that all seven of the Hegis code 0513 programs in New York State, are in the downstate region (see above section E.2, paragraph 1 and attachment 2).

3. The fact that all seven of the Hegis code 0513 programs in New York State have altogether produced but 237 graduates during the past six years (see above, section C.1.c.).

4. The fact that student demand for such a course of study appears to be increasing steadily as is indicated by the steady increase in graduates from Hegis code 0513 programs from 1977-1983 (see above, section C.1.c. and attachment 5).

5. The number of students at Brockport who have elected a "double major" option similar to this proposed program (see below, section C.2.b.).

6. The survey of students in the International Business minor (see below, section C.2.a. and attachment 7).

2. State how the enrollment estimates projected in D3a. and E3a. below were determined, i.e., what surveys were conducted. Specify the number of students who have requested that this program be established:

a. In the Spring 1985 semester a survey of Business Administration majors who had chosen the International Business concentration was conducted to determine if those students who had elected the existing concentration (minor) might have chosen a course of study which would have allowed them to develop a cross-cultural perspective within the context of their major, had that option been available to them. This survey of indicated that 72% of these students would have "liked to have received more specifically 'internationally oriented' coursework in the non-business courses" they had taken. Two-thirds of those students responding to the poll indicated that they would have chosen "the option of combining their business courses with an organized program of related coursework in international studies," had that option been
available to them.
Copies of the survey instrument and the results of this survey are attached (attachment 7).

b. The College at Brockport has enrolled, during the past few years, a regular number of foreign language and/or social science majors who have elected to "double major" in Business Administration as a preparation for a career in international business. There are presently nine Brockport students engaged in a combined "program" of study in Business Administration and a foreign language and three students with "double majors" in one of the Social Science Departments and the Department of Business Administration and Economics. The College at Brockport graduated one such student in 1984, three in 1983, and two in both 1982 and 1981. This double-major option is disadvantageous in that it permits these students very few "free electives" during their undergraduate careers and a transfer student who might elect this option would typically be unable to complete such a course in less than a total of five years (see attachment 8).

2. If the program is designed to prepare its graduates for immediate employment, indicate potential employer of such graduates who have requested establishment of the program and their specific employment needs. Assess employment possibilities in general for graduates of the program.

a. The Advisory Board of the Rochester Area Chamber of Commerce's International Business Council (which has a membership of more than 300 area businesses that are involved in overseas trade) reviewed this proposal at its 20 February 1985 meeting. This Advisory Board saluted Brockport's commitment to a program in International Business and Economics reported that it did indeed see the need for such a program being offered in the Greater Rochester area. Further it expressed the opinion that "students graduating from SUNY/Brockport, with a degree in International Business and Economics, will be looked upon as more qualified than graduates with simple Business Administration degrees, and would, therefore, be more hirable." (A report of this review, together with the Advisory Board's recommendations regarding elective courses which might most profitably be taken by students who

Page 23 of 50
1984-1985-30res.doc
had entered this proposed major, is contained in the 31
February 1985 letter from the
International Business Council’s Vice President
attached to this report (Attachment 6).)

b. After reviewing this program with local firms
engaged in international trade, Mr. Barry Ryan,
President of International Personnel Services (a
Rochester-based human resources and personnel
management firm which specializes in the field of
international personnel management) concluded
that “graduates of this program can enter-the-average employment opportunities upon
graduation.” His review of this program stressed
the suitability of the Rochester area (which, as
he points out, accounts for 41% of New York
State’s exports, compared to 24% for Buffalo and
33% for the downstate region) as the locale for a
program emphasizing international business and
the understanding of the cross-cultural and
linguistic aspects of international trade. This
report points out that there are, in the Greater
Rochester area, a large number of small to
medium-sized firms which would find graduates of
this program “particularly attractive.”

Mr. Ryan notes, “Exports by firms in the Greater
Rochester area...have created 165,423 jobs. This
number should increase dramatically as the
economic recovery spreads to overseas
marketplaces, and will even accelerate when the
proposed Foreign Trade Zone for Rochester is
approved and implemented.” His report concludes
that “there is a need for this program...it is
commercially very viable, and it is exceedingly
well suited to the Greater Rochester area at this
time.” (This report is attached, attachment 9.)

4. Articulation and Transfer:
a) The proposed major in International Business and
Economics would have the potential for articulation
with Monroe Community College’s Business
Administration Program. A letter from the dean of
MCC’s Business division is attached (Attachment 10),
which comments on this potential for articulation.
The College at Brockport anticipates that graduates
of most two-year colleges in New York State who have
entered to major in either Business Administration or
International Studies for their Associate of Arts and
Science degrees will be able to transfer this program
at the third-year level having completed a
substantial portion of either (in the case of
Business Administration majors) the Economic Theory
and Business Policy Core or [in the case of International Studies majors] the Cross-Cultural Perspective Core and the Language Requirement. A specific articulation agreement with Monroe Community College is envisioned.

b) Graduates of the proposed International Business and Economics Program would be able to continue their studies at SUNY Buffalo (in the graduate-level International Business and World Trade program). A description of this program is attached, attachment 10.

A student who has completed the course of study required for Brockport’s proposed Bachelor of Arts degree in International Business and Economics would be able to enter the Master of International Management degree program (at the American Graduate School of International Management ["Thunderbird"] in Glendale, Arizona) without having to complete the introductory courses in either the World Business, the International Studies, or the Modern Language segments of this program (a copy of the description of the curriculum of the program—widely regarded as one of the nation’s foremost graduate programs in International Business—is attached, attachment 13).

Also attached to this material describing the Master of International Management degree program is a letter from the Dean of Admissions at the American Graduate School of International Management (attachment 13, pp. 5-7). In this letter, Dean Arthur characterizes a student who had completed the proposed program as “highly desirable” for admission to the program at Thunderbird. He describes the proposed program as “rigorous,” and “impressive” and one which would provide a “thorough preparation” for graduate work in International Management.
Section D

D. Five-year projections - Resources and Costs:

The data contained in this section are predicated on the following six assumptions:

a. Student enrollment in this proposed major will match that which is projected. (A description of the information on which this estimate is based is contained in Sections C.1.e and C.2.a and b, above.)

b. Part-time students majoring in this proposed major will enroll for an average of 7.5 credit hours; full-time enrollment will consist of a student registering for fifteen credit hours each semester.

c. An undergraduate who chooses this major will, each semester, take an average of approximately 47.5% of her/his total coursework in courses required by the major (see Section H.1.a. and attachment 15 below).

d. An average student/faculty ratio of 17:1 will be maintained in the courses offered in this proposed major.

e. Contract settlements (for compensation, including benefits) between the State and the UUP will average 7% each year during the next five years. This assumption will, it should be stated at the outset, inflate the estimates since it presupposes that in five years' time the identical seventy staff members will be offering these courses. A more realistic estimate would be lower since it is likely that some of these faculty members will leave the employ of SUNY to be replaced by more junior (and therefore lower paid) staff.

f. The average annual compensation (including benefits) for the seventy members of the instructional staff at Brockport who currently offer at least one of these courses is presently $30,767.96.

In an absolute sense, this proposed major in International Business and Economics will cost the State University of New York nothing. All of the courses which are required, or are to be elected, or are recommended, are now regularly offered at the State University College at Brockport; all of the faculty who will be needed to implement the program are presently on the College’s staff. Thus, if, as a result of the implementation of this program, a course which now enrolls twenty-eight students will have several International Business and Economics majors among the twenty-eight or even might enroll an additional four or five of these majors in that course, the salary of the instructor would not change at all. All that would change is the computation of that proportion of the instructor’s salary which might be assigned against each International Business and Economics major’s enrollment. Consequently, instead of counting each enrollment in that hypothetical course as
Section D

one-twenty-eighth of the total for its instructional costs. The four or five enrollments by students majoring in International Business and Economics would then be counted as between either one-twenty-eighth or one-thirty-third of that total cost. However, the total cost of offering this course would remain the same. The data below display this theoretical reallocation of these costs.

</tbody>
</table>

2. Computation of total student credit hours taught by the total faculty reports on page D-8 (item D.3.b.111)

   A student/faculty ratio of 17:1 (assumption d, p. D.1) would require (for a staff of 70 FTE faculty (see Section 1 below)) a total of 1190 FTE students enrolled for an annual total of 35,700 credit hours according to the following formulas:
   a. 17 X 70 = 1190 FTE students
   b. 1190 X 30 credit hours = 35,700 credit hours [this is the data entered on line D.3.b. (5) above]

3. Computation of student credit hours by non-course taught by total faculty reports on page D-8 (item D.3.b.111)

   Description of data below:
   Line a. Total credit hours of courses taught by faculty identified (this is line E.b. above)

   page D-8

1984-1985-30res.doc
Section D

Line b. Hours to be taken by students in proposed major
(this is line 1.e. above)

Line c. Remaining (these are the numbers entered at Item D.3.b. (2) )

Computation:

a. 35,700.00 35,700.00 35,700.00 35,700.00 35,700.00

4. Computation of staffing requirements:

The percentage that the total credit hours taken by majors in proposed program is to the total credit hours taught by the faculty who are presently teaching those courses required for this program = x / 35,700 X 100
(Where x is the number of hours to be taken by the estimated projected number of majors in courses in proposed major, Item 1.e. above.)

a. x/35,700 X 100 = 0.75% 1.55% 1.15% 1.95% 2.95%

Therefore, the number of FTE faculty lines which might be ascribed to International Business and Economics enrollments is: (number of faculty X y% [y = line 4.e. above]) (these then become the numbers entered at Item D.1.e(1))

b. 7% X y% =

0.75% 1.55% 1.15% 1.95% 2.95%

c. Which are rounded to:

.2 .4 .8 1.4 2.1

5. Computation of staffing costs:

a. The average 1984/5 compensation (including benefits) of the instructional staff who presently offer the courses listed in section H below increased by 7% per annum (see assumptions e and r on p. D-1) becomes:

$4164.73 $4365.44 $4749.49 $50816.89 $54374.87

b. Proportion of the above average compensation which is likely to be ascribed to enrollments by majors in International Business and Economics (Item 4.e. above):

X_2 X_4 X_8 X_14 X_21

page D-9
Section D

c. Estimated total cost to be assigned to credits enrolled in by majors in International Business and Economics (see assumption e on p. D-1) (these become the numbers entered at item D.1.a.1)

\[(5.6 \times 3.5) = 19.626, 13, 3799, 94, 71143, 16, 114363.56\]

E. This Section is to be completed only by Community Colleges.
Section F

F. 1. How will program quality be maintained and monitored? Describe provisions for regular program review, which should include evidence of student achievement, faculty performance, and placement of graduates.
   a. Students who intend to major in International Business and Economics will be required to earn a grade of "C" or better in each of the five lower division courses in the Economic Policy and the Business Theory Cores and the quantitative skills requirement prior to admission to the major.
   b. A Board of Study, composed of the Director of the Global Studies Program, the Chairpersons of the Department of Business Administration and Economics and the Department of Foreign Languages, or their designees, and designees representing the Deans of the Schools of Professions and Letters and Sciences, will monitor the quality of instruction, student achievement, and faculty performance.
   A formal biennial review of the student achievement, faculty performance and placement of graduates of this program will be conducted by the Board of Study. This review will be in addition to its ongoing monitoring of the program. Since this program is an interdisciplinary program which draws its course offerings from among those courses regularly offered at Brockport, it should be noted that this Board of Study's reviews will be in addition to those mechanisms which are already extant and in place for the maintainance of program quality within each department.

2. If this is a professional program for which special accreditation is to be sought, provide the name(s) of the accrediting agency(ies) and a timetable for completing the accrediting process.

This program does not require special accreditation.
Section 6

G. Describe the criteria and procedures for admission of students to the proposed program and the advisement process as students proceed through the program.

Students seeking to major in International Business and Economics must present evidence to the Director of the Program that they have completed ECN 201 (Microeconomics), ECN 202 (Macroeconomics), ECN 204 (Introduction to Economic Statistics), BUS 205 (Fundamentals of Accounting I), BUS 285 (Fundamentals of Accounting II), and MTH 221 (Advanced Calculus for the Social and Life Sciences I), with a grade of "C" or better in each course, together with evidence that they have an earned cumulative grade point index of 2.5. Or these criteria, the Director of the program will admit students to this major.

The Director of the program will advise students majoring in International Business and Economics on their course of studies.

The Board of Study will review appeals made to decisions of the Director of the Program.
Section H

H. Develop complete outline of the course of study, including requirements and credit hours, and indicate when and how often each course will be offered over the period of time required for program completion by a student. For existing courses, include detailed descriptions as they are in current catalog.

1. Outline of the course of study indicating requirements, credit hours, and frequency of course offerings.

A. General Requirements:

1. Bachelor of Arts in International Business and Economics (An Interdisciplinary Major)

2. Total hours required: 180 with a "C" average or better
3. General Education requirements: 36 credit hours
4. Upper division requirement: 48 hours at 300-level or above
5. Liberal Arts hours: 90 credit hours
6. The Major Program:
   There are four block cores and two required units to the major. They are:
   a. Block Cores:
      1. The Economic Policy Core (12 credit hours)
      2. The Business Theory Core (12 credit hours)
      3. The International Business Core (12 credit hours)
      4. The Cross-Cultural Core (15 credit hours)
   b. Required Units:
      1. Language Requirement (3-15 credit hours)
      2. Quantitative Area Requirement (3 credit hours)

B. Specific requirements of the major in International Business and Economics: (All courses listed are 3 credit-hour courses.)

1. The Block Cores:
   a. Economic Policy Core: (12 credit hours)
      1. ECN 201, Microeconomics
      2. ECN 202, Macroeconomics
      3. ECN 204, Introduction to Economic Statistics
      4. Choice of: 1) ECN 301, Price Theory
      2) ECN 382, Income Theory
      3) BUS 385, Managerial Economics
   b. Business Theory Core: (12 credit hours)
      1. BUS 285, Fundamentals of Accounting I
      2. BUS 286, Fundamentals of Accounting II
      3. BUS 333, Principles of Marketing
      4. BUS 365, Principles of Management

*This course was formerly registered as ECN 303, "Introduction to Economic Statistics."
3. International Business Core: (12 credit hours)
a. Required:
   ECN 441, International Trade Theory
   ECN 442, International Economic Policy
   ECN 451, Economics of Development
   ECN 452, Economic Planning
b. Electives:
   BUS 345, Environmental Aspects of Int'l Business
   BUS 445, International Business Management
   PLS 315, Governmental Regulation of Business
   PLS 372, Politics of International Economics
   PLS 445, International Law and Organization

4. Cross-Cultural Core: (15 credit hours)
   1. Required: PLS 300, Human Relations in Mgmt.
   2. Electives: Four courses from the following: (12 credit hours)
      ANT 320, Cultural Encounter
      ANT 322, Culture and Power
      ANT 330, World Poverty and Underdevelopment
      ANT 400, Topics in Human Survival
      CMIC 318, Cross-Cultural Communication
      PCE 420, Multiculturalism in U.S.
      GGS 212, The Nature of Global Interdependence
      PLS 281, Inter-Nation Simulation
      PLS 333, American Foreign Policy
      PLS 334, Comparative Foreign Policy
      PLS 335, Contemporary Issues in Int'l Relations
      PLS 240, Latin American Politics
      PLS 354, Third World Politics
      SOC 326, Social Change: U.S. and the Third World
      SOC 341, Population and Society

E. The Required Units:
   1. Language Requirement: one 300+ level course in a
      foreign language.
      (May require as many as 15 credit hours for a student
      who enters Brockport with no language).
      (3-15 credit hours)
   2. Quantitative Area Requirement: (3 credit hours)
      MTH 221, Applied Calculus for the Social and
      Life Sciences I

F. Additional advisement recommendations for students
   majoring in International Business and Economics:

   1. Students should be encouraged (via the advisement
      process) to meet the General Education Social Science
      breadth component with either:
      HST 102, The Modern World
      PLS 111, World Politics
      ANT 111, Anthropology and the World

   page H-2
Section H

ANT 114, World Cultures
PLS 110, Foreign Governments

D. Students in this major should also be encouraged to take:
   a. ENL 327, Business Writing,
   b. A grammar course (ENL 190 Intro. to Grammar, or
      ENL 481 English Grammar, or a comparative grammar
      course taught by the Department of Foreign
      Languages), and
   c. BUS 325, Corporate Finance,
      BUS 475, Business Policy and Environment.

3. Students majoring in International Business and
   Economics should also be encouraged to participate in
   an appropriate overseas academic program.

All of the courses contained in this description are
presently regularly offered by Brockport's various academic
departments. A copy of Brockport's 1984-85 undergraduate
catalog containing descriptions of each of these courses is
attached (Attachment 14). A sample curriculum illustrating
the manner in which a student might complete this proposed
program of study is also attached (Attachment 15).

4. This catalog indicates the frequency with which these
courses are offered. That frequency has been, and is
expected to continue to be:

   a. Offered both semesters of each year:
      1. The Economic Policy Core Courses:
         ECO 201
         ECO 202
         ECO 204
         ECO 301
         ECO 302
         BUS 305
      2. The Business Theory Core Courses:
         BUS 285
         BUS 286
         BUS 335
         BUS 365
      3. The courses to fulfill the language
         requirement.
      4. The course to fulfill the quantitative
         requirement (MTH 221)
      5. The required course in the Cross-Cultural
         Core (BUS 366).
6. Other courses offered both semesters of each year: (PLS 325, BUS 472, ENL 207)
   b. Offered in the Spring semester of every year:
      ECO 441
      ECO 422
      BUS 445
      PLS 521
      ENL 200
      SOC 420
      CMC 319
   c. Offered in the Fall semester of every year:
      ECO 442
      ECO 451
      BUS 345
      ECO 221
      PLS 333
      PLS 242
      PLS 372
   d. Offered at least once every two years:
      PLS 314
      PLS 334
      PLS 320
      PLS 364
      PLS 445
      ENL 401
      SDC 326
      SDC 241

* Required Course
** Elective Course

2. For new courses, include syllabus or detailed outline of subjects covered for each. For fieldwork experience, describe duration of, and arrangements for evaluation. Include provisions for granting credit for non-academic experiences.

This proposal requires neither new courses, fieldwork experience nor provisions for granting credit for non-academic experiences.
Section I

1. Append vitae of present faculty members if any,
and will administer the program. Indicate each
faculty member's rank and full-time or part-time
status and for which courses each faculty member
will be responsible. Also indicate who will be
the program director or coordinator.

2. Additional faculty are not to be recruited for this program.

3. The Program Director will be appointed by the Vice President for Academic Affairs from among those faculty at the College whose vitae are attached.
Section J

J. Describe the library holdings presently available for use in the program and plans for acquisition of needed additional materials.

This information is contained in a 6 February 1985 memorandum from Ms. Raj Madan, Associate Director of the Drake Memorial Library for Public Services. A copy of this memorandum is attached (attachment 17).
Section K

K. Graduate programs: include special provisions for external evaluation procedures and evaluation guidelines.

This section does not apply since the proposed program is an undergraduate degree program.
L. Append local resolutions and support documents:

1. Attached to this proposal are resolutions of support from:
   a. Brockport's Department of Foreign Languages (Attachment 18).
   b. Brockport's Department of Political Science (Attachment 19).
   c. Brockport's Department of Business Administration and Economics (Attachment 20).

2. See also the following documents which contain statements of support for this program:
   b. Letter from Mr. Gary Ryan, President of International Personnel Services (Attachment 9).
   c. Letter from Dr. Raymond Ruff, Dean of the Business Division, Monroe Community College (Attachment 10).
   d. Letter from Dean John James Arthur, Dean of Admissions, American Graduate School of International Management (attachment 13, pp. 5-7).
Section M

The baccalaureate degree in International Business and Economics will not involve approval of a major or minor.

This proposed interdisciplinary major in International Business and Economics, by its integration of a systematic course of professional studies with a coherent and concurrent course of social science and humanities courses, straightforwardly addresses the College at Brockport's mission to provide for its students a "balanced blend of theoretical and practical knowledge." This proposed program's curriculum epitomizes the "strong relationships between the liberal arts disciplines and professional studies," that is an essential element of the quality higher education which the College at Brockport provides. A copy of the College's Mission Statement is attached (Attachment 6).
