Margaret Blackman, Chair

RE: Revision of Anthropology Major

The Anthropology Department wishes to make several changes in its major program in order to: i) expedite the new General Education writing within the discipline requirement and ii) provide a more realistic link between the research methods course and the senior project.

These changes will provide more systematic writing instruction at the junior level—when our students most need it—while providing a more congenial flow into and through the senior project.

1. Designate Anthropological Research (currently ANT 495) as the advanced writing course, renumber it as ANT 494, and require it in Spring of the Junior year.

Rationales:

- Our students need a formal introduction to writing in anthropology prior to the senior year.
- This will provide a more formal link between ANT 370—Anthropological Literature and the research methods course.
- Early exposure to research methods will help majors get more out of other major courses.
- It will provide more lead time between the methods course and the senior project.
- It will allow more time to concentrate on conventions of writing in anthropology.
- By transferring the research design to a separate course (see #2, below) it will free up more time to concentrate on technique and data analysis in Anthropological Research.

2. Add a new 1 credit course: ANT 496—Research Design Seminar. It will be offered in Fall of the Senior year and will be devoted to developing the research design for the senior project.

Rationales:

- Although a major goal of Anthropological Research course is the completion of the research design for the senior project, it is difficult to mesh this with all of the other requirements for the course.
- With the exception of a few students who are extremely focused, it is difficult for most students to identify, clarify, initiate and complete the senior project in a timely manner.
- It will provide a more focused venue for exploring and designing the senior project.
