    and
    Jenny Lloyd, President, Faculty Senate

From: Kathy Hunter, Chair
      Health Science Undergraduate Curriculum Committee

Re: Professional Preparation Program Proposal request

The Health Science is proposing a minor change in the Professional Teacher Preparation Program. We would like to replace HLS 304 - Safety, Standard First Aid, and CPR with HLS 313 - Introduction to Safety because our teacher certification requirements have increased with regard to the safety components. HLS 313 is an existing course and there will be NO change in the required credits hours for the program.

Please see the attached side by side of the current and proposed programs, in addition to a brief rationale for the change.

You may contact me at my office (extension 2764) if further information is required. Thank you for your consideration of this matter.
Department of Health Science - Professional Preparation Program
Minor Curriculum Change Proposal Request

The Professional Preparation Program may be pursued as a track of the Liberal Arts program in Health Science. HLS 313 (Introduction to Safety) is a required course for our program curriculum. Due to the new safety requirements, necessary as part of our Health Education teacher certification process, this course is ideal. The HLS 304 (Safety, Standard First Aid, and Community CPR) is not required for teacher certification, but has been offered, as a convenience, for the student teachers of the college. The Health Science faculty unanimously agreed to replace HLS 304, within the Professional Preparation tract, with HLS 313 in order to satisfy the new Health Education teacher certification requirements in safety. There would not be any change in the total credits necessary to complete the Professional program.
